

ZETIN

Smart Porcelain Furnace

ZTCF-20B Pro

Technical Parameters

Max.Temperature	1300°C
Max.Vacuum	-98kpa
Heating Rate	≤140°C/min
Temperature Accuracy	Within ±1°C
Chamber Size	∅100m*70 mm
Power	1600W
Voltage	220V 50/60HZ
Total Program No.	100 programs (Can extend to 500 programs)
Size	460×220×300mm(L×W×H)
Net Weight	18 KG

Features

Small Size & Exquisite	Lifting chamber design reduces the size and make the body compact, exquisite and beautiful.
Glass Ceramics Available	Multi stage heating design, capable of sintering glass ceramics.
High-Quality and Efficiency	Imported heating wire, uniform heating, long service life, and pollution-free, avoiding under-firing, no inaccurate color.
Program Preset Function	The machine is equipped with Ivoclar, Vita, and Noritake powder programs, which users can directly choose according to their needs.
Precision Temperature Control	PID Intelligent temperature control system, achieves a temperature control accuracy of ±1°C to enhance product quality.
Accurate Sense	Imported sensor, precise vacuum measurement.
High Quality Accessories	Ultra long service life oil-free vacuum pump, high vacuum,maintenance free, and low noise.
High-Definition Touch Screen	Featuring large-size touch screen, data visualization interface, and icon-based operation buttons, simple and easy to use.
Core Protection	Unique vacuum pipeline filtration design ensures the life span of relevant components.
Energy-Saving	New environmentally friendly insulation materials with good insulation performance ensure stable furnace temperature.
